

## Science

### Year A: Autumn Term 2

Years 1&2 Milestone 1	Years 3&4 Milestone 2	Years 5&6 Milestone 3
<p>Milestones</p> <p><b>To investigate materials</b></p> <ul style="list-style-type: none"> <li>• Distinguish between an object and the material from which it is made</li> <li>• Identify and name a variety of everyday materials, including wood, plastic, glass, metal, water and rock</li> <li>• Describe the simple physical properties of a variety of everyday materials</li> <li>• Compare and group together a variety of everyday materials on the basis of their simple physical properties.</li> </ul> <p><b>To work scientifically</b></p> <ul style="list-style-type: none"> <li>• Ask simple questions</li> <li>• Identify and classify</li> <li>• Perform simple tests</li> <li>• Observe closely, using simple equipment.</li> <li>• Use observations and ideas to suggest answers to questions</li> <li>• Gather and record data to help in answering questions</li> </ul>	<p>Milestones</p> <ul style="list-style-type: none"> <li>• <b>To investigate materials</b> Compare and group together different kinds of rocks on the basis of their simple, physical properties</li> <li>• Relate the simple physical properties of some rocks to their formation (igneous or sedimentary)</li> <li>• Describe in simple terms how fossils are formed when things that have lived are trapped within sedimentary rock</li> <li>• Compare and group materials together, according to whether they are solids, liquids or gases</li> <li>• Observe that some materials change state when they are heated or cooled, and measure the temperature at which this happens in degrees Celsius (°C), building on their teaching in mathematics</li> <li>• Identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature.</li> </ul> <p><b>To work scientifically</b></p> <ul style="list-style-type: none"> <li>• Ask relevant questions</li> <li>• Report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions</li> <li>• Identify differences, similarities or changes related to simple, scientific ideas and processes</li> <li>• Use straightforward, scientific evidence to answer questions or to support their findings</li> </ul>	<p>Milestones</p> <p><b>To investigate materials</b></p> <ul style="list-style-type: none"> <li>• Compare and group together everyday materials based on evidence from comparative and fair tests, including their hardness, solubility, conductivity (electrical and thermal), and response to magnets.</li> <li>• Understand how some materials will dissolve in liquid to form a solution and describe how to recover a substance from a solution.</li> <li>• Use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating.</li> <li>• Give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic.</li> <li>• Demonstrate that dissolving, mixing and changes of state are reversible changes.</li> <li>• Explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning, oxidisation and the action of acid on bicarbonate of soda</li> </ul> <p><b>To work scientifically</b></p> <ul style="list-style-type: none"> <li>• Plan enquiries, including recognising and controlling variables where necessary.</li> <li>• Use appropriate techniques, apparatus, and materials during fieldwork and laboratory work.</li> <li>• Take measurements, using a</li> </ul>

	<ul style="list-style-type: none"> <li>• Make accurate measurements using standard units, using a range of equipment, e.g. thermometers and data loggers).</li> </ul>	<p>range of scientific equipment, with increasing accuracy and precision.</p> <ul style="list-style-type: none"> <li>• Record data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, bar and line graphs, and models.</li> <li>• Report findings from enquiries, including oral and written explanations of results, explanations involving causal relationships, and conclusions.</li> <li>• Present findings in written form, displays and other presentations.</li> <li>• Use test results to make predictions to set up further comparative and fair tests.</li> <li>• Use simple models to describe scientific ideas, identifying scientific evidence that has been used to support or refute ideas or arguments.</li> </ul>
--	---	---

### Year A: Summer Term 6

Years 1&2 Milestone 1	Years 3&4 Milestone 2	Years 5&6 Milestone 3
<p>Milestones</p> <p><b>To understand animals and humans</b></p> <ul style="list-style-type: none"> <li>• Investigate and describe the basic needs of animals, including humans, for survival (water, food and air)</li> <li>• Describe the importance for humans of exercise, eating the right amounts of different types of food and hygiene.</li> <li>• Identify and name a variety of common animals that are birds, fish, amphibians, reptiles, mammals and invertebrates</li> <li>• Identify and name a variety of common animals that are carnivores, herbivores and omnivores</li> <li>• Describe and compare the structure of a variety of common animals (birds, fish, amphibians, reptiles, mammals and invertebrates, including pets)</li> </ul>	<p>Milestones</p> <p><b>To understand animals and humans</b></p> <ul style="list-style-type: none"> <li>• Identify that animals, including humans, need the right types and amounts of nutrition, that they cannot make their own food and they get nutrition from what they eat.</li> <li>• Describe the ways in which nutrients and water are transported within animals, including humans.</li> <li>• Identify that humans and some animals have skeletons and muscles for support, protection and movement.</li> <li>• Describe the simple functions of the basic parts of the digestive system in humans.</li> <li>• Identify the different types of teeth in humans and their simple functions.</li> </ul>	<p>Milestones</p> <p><b>To understand animals and humans</b></p> <ul style="list-style-type: none"> <li>• Identify and name the main parts of the human circulatory system, and explain the functions of the heart, blood vessels and blood (including the pulse and clotting).</li> </ul> <p><b>To understand evolution and inheritance</b></p> <ul style="list-style-type: none"> <li>• Recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents.</li> <li>• Describe how adaptation leads to evolution.</li> <li>• Recognise how and why the human skeleton has changed over time, since we separated from other primates.</li> </ul>

Cousham Regis  
Primary Academy

<ul style="list-style-type: none"> <li>Identify name, draw and label the basic parts of the human body and say which part of the body is associated with each sense</li> <li>Notice that animals, including humans, have offspring which grow into adults</li> </ul> <p><b>To work scientifically</b></p> <ul style="list-style-type: none"> <li>Ask simple questions</li> <li>Identify and classify.</li> </ul>	<p><b>To understand evolution and inheritance</b></p> <ul style="list-style-type: none"> <li>Identify how plants and animals, including humans, resemble their parents in many features.</li> <li>Recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago.</li> <li>Identify how animals and plants are suited to and adapt to their environment in different ways.</li> </ul> <p><b>To work scientifically</b></p> <ul style="list-style-type: none"> <li>Ask relevant questions</li> <li>Report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions</li> <li>Identify differences, similarities or changes related to simple, scientific ideas and processes</li> <li>Use straightforward, scientific evidence to answer questions or to support their findings</li> </ul>	<p><b>To work scientifically</b></p> <ul style="list-style-type: none"> <li>Ask relevant questions</li> <li>Report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions</li> </ul>
--	--	---

**Year B: Autumn Term 2**

<p><b>Years 1&amp;2 Milestone 1</b></p>	<p><b>Years 3&amp;4 Milestone 2</b></p>	<p><b>Years 5&amp;6 Milestone 3</b></p>
<p>Milestones</p> <p><b>To investigate materials</b></p> <ul style="list-style-type: none"> <li>Find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching</li> <li>Identify and compare the uses of a variety of everyday materials, including wood, metal, plastic, glass, brick/rock, and paper/cardboard.</li> </ul> <p><b>To work scientifically</b></p> <ul style="list-style-type: none"> <li>Ask simple questions</li> <li>Identify and classify</li> </ul>	<p>Milestones</p> <p><b>To investigate light and seeing</b></p> <ul style="list-style-type: none"> <li>Notice that light is reflected from surfaces.</li> <li>Associate shadows with a light source being blocked by something; find patterns that determine the size of shadows</li> <li>Understand that light appears to travel in straight lines.</li> <li>Use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eyes.</li> <li>Use the idea that light travels in</li> </ul>	<p>Milestones</p> <p><b>To understand movement, forces and magnets</b></p> <ul style="list-style-type: none"> <li>Notice that some forces need contact between two objects and some forces act at a distance</li> <li>Observe how magnets attract or repel each other and attract some materials and not others</li> <li>Describe magnets as having two poles.</li> <li>Predict whether two magnets will attract or repel each other, depending on which poles are facing.</li> <li>Explain that unsupported objects</li> </ul>

<ul style="list-style-type: none"><li>• Perform simple tests</li><li>• Observe closely, using simple equipment</li><li>• Use observations and ideas to suggest answers to questions</li><li>• Gather and record data to help in answering questions</li></ul>	<p>straight lines to explain why shadows have the same shape as the objects that cast them, and to predict the size of shadows when the position of the light source changes.</p> <p><b>To investigate sound and hearing</b></p> <ul style="list-style-type: none"><li>• Identify how sounds are made, associating some of them with something vibrating</li><li>• Recognise that sounds get fainter as the distance from the sound's source increases</li><li>• Find patterns between the pitch of a sound and features of the object that produced it.</li><li>• Find patterns between the volume of a sound and the strength of the vibrations that produced it.</li></ul> <p><b>To work scientifically</b></p> <ul style="list-style-type: none"><li>• Ask relevant questions</li><li>• Report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions</li><li>• Identify differences, similarities or changes related to simple, scientific ideas and processes</li><li>• Use straightforward, scientific evidence to answer questions or to support their findings</li><li>• Make accurate measurements using standard units, using a range of equipment, e.g. thermometers and data loggers.</li></ul>	<p>fall towards the Earth because of the force of gravity acting between the Earth and the falling object.</p> <ul style="list-style-type: none"><li>• Identify the effect of drag forces, such as air resistance, water resistance and friction that act between moving surfaces.</li><li>• Describe, in terms of drag forces, why moving objects that are not driven tend to slow down</li><li>• Understand that force and motion can be transferred through mechanical devices such as gears, pulleys, levers and springs.</li></ul> <p><b>To understand the Earth's movement in space</b></p> <ul style="list-style-type: none"><li>• Describe the Sun, Earth and Moon as approximately spherical bodies.</li><li>• Use the idea of the Earth's rotation to explain day and night.</li><li>• Describe the movement of the Earth relative to the Sun in the solar system</li><li>• Describe the movement of the Moon relative to the Earth</li></ul> <p><b>To understand electrical circuits</b></p> <ul style="list-style-type: none"><li>• Identify and name the basic parts of a simple electrical circuit, including cells, wires, bulbs, switches and buzzers.</li><li>• Identify whether or not a lamp will light in a simple series circuit based on whether or not the lamp is part of a complete loop with a battery.</li><li>• Associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit.</li><li>• Compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off</li></ul>
---	---	--

		<p>position of switches</p> <ul style="list-style-type: none"> <li>• Recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit.</li> <li>• Recognise some common conductors and insulators and associate metals with being good conductors.</li> </ul> <p><b>To work scientifically</b></p> <ul style="list-style-type: none"> <li>• Plan enquiries, including recognising and controlling variables where necessary.</li> <li>• Use appropriate techniques, apparatus, and materials during fieldwork and laboratory work.</li> <li>• Take measurements, using a range of scientific equipment, with increasing accuracy and precision.</li> <li>• Record data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, bar and line graphs, and models.</li> <li>• Report findings from enquiries, including oral and written explanations of results, explanations involving causal relationships, and conclusions.</li> <li>• Present findings in written form, displays and other presentations.</li> <li>• Use test results to make predictions to set up further comparative and fair tests.</li> <li>• Use simple models to describe scientific ideas, identifying scientific evidence that has been used to support or refute ideas or arguments.</li> </ul>
