| <p>KB discussed with the children matters arising from the last meeting.</p> | <p>KB told the Crew that sadly, we have only had one child bring in photos of them doing "physical activity" out of school for our display. This is despite a reminder to the school in assembly a couple of weeks ago.</p> <p>Everyone was disappointed but the Crew is not deterred. Consideration was given about whether having to bring in actual photos (which may require children to have a printer at home) may be stopping some. It was decided to ask GS to resend the message but this time suggest photos are emailed in and hopefully this might stimulate a better response.</p> | <p>GS to remind families and children about sending in photos of children doing physical activity out of school (dog walking, playing in the park, walking to school etc. As well as photos of children playing organised sport). Suggest that photos can be emailed in as well as sent in as a photo.</p> |

| <p>KB talked to the children about how playtimes are going, particularly lunchtimes.</p> | <p>The crew still feel that more equipment is needed. EB suggested rackets and balls – and everyone agreed more tennis balls are required. CS also suggested logs for children to walk/balance along.</p> <p>KB suggested that the crew carry out a survey of the children in school to find out what equipment would be preferred. She explained that first, the children would have to do some research to find out what equipment is out there and available to buy and what the costs would be. The children agreed to do this.</p> <p>KB suggested that the next step after this would be for the children to consider how they might do some fundraising in order to buy the new equipment. Ideas suggested were-</p> <p>Cake Sale Bring and buy sale (of used books) Some sort of sponsored event which involved physical activity – maybe using the equipment they want to buy!</p> <p>KB suggested that the children have a think about this last point and bring their ideas to the next meeting, along with their research of what equipment they might want to get and the survey of the school's preferred choices.</p> | <p>Crew to go away and research playground equipment that might be bought.</p> <p>Crew to complete a survey to find out what equipment the children in school would like most.</p> |
| <p>AOB</p> | <p>KB suggested that the Crew meet up early next term with the results of their research and survey.</p> | |
