How do we see?

How do we see?

What are the different sources of light?

What is darkness?

Which materials reflect light?

How are shadows made?

How can you change the size of a shadow?

What is an electrical circuit?

What techniques can we use to join materials together to make a model?

How can we use cutting and shaping techniques (such as slots and cut outs) to make a model?

How can we cut materials accurately and safely using the appropriate tools to make a model?
