

School Closure Daily Planning-Week 4-Amethyst Class

Date	Reading	Writing	Mathematics	Topic
Friday 29.01.21	Mark the answers from yesterday. Read for 20 minutes to half an hour and then tell someone what has happened in your book or what you have learnt from it.	<u>Spelling:</u> Have one last practice of spellings. Then get ready, it's Dictation Time!	Make a poster to explain how to find the area of rectangles, compound shapes and triangles. Once you have finished, spend some time on Mathematics: look for questions on area first.	<u>Science:</u> Go through the friction information on the slides, answering the questions as you go. Then complete the experiment, using resources from around your house. Assuming you don't have a forcemeter at home (!) just use your hand to pull the object (you might need to attach it to string or a paperclip - use the same thing for every object). Print the sheet if you want/can, or use the headings to write up the experiment in your books.
