

SUBJECT LEADER IMPACT REPORT HUMANITIES 2024-25

Together Everyone Achieves More

INTENT (HISTORY)

Children are taught a range of historical knowledge and skills through a variety of activities. These skills are met throughout their school years and develop according to the children's ability. They encourage expansion of the children's knowledge and understanding of time and events in the past, as well as patterns and processes and the effect of historical events on our lives today

How to communicate using appropriate vocabulary

FS2 children look at the lives of people who are familiar to them; remember and talk about significant events in their own experiences; recognise and describe special times or events for family or friends and look closely at similarities, differences, patterns and change.

In KS1, the children are taught to use appropriate historical vocabulary to communicate, including: dates; time period; era; change; and chronology. At KS2 level, children build on their learning from KS1 and are also taught to use appropriate historical vocabulary to communicate the following: continuity; century; decade; and legacy.

Across the whole school, pupils use writing, maths and computing skills in order to communicate information about the past, as well using original ways to present information and ideas.

About Corsham and their local area

At Foundation level and KS1, the pupils study people and places in their own locality. This includes going on school trips to local places or walks around the local area, in order for the children to get a first-hand experience.

Whilst at Key Stage 2, the pupils build on these skills of historical enquiry, through a local history study, which again is facilitated by local trips and walks.

Through experiences inside and beyond the classroom

Across the whole school, the pupils are taught using range of resources and sources, to give them varied experiences of history. This includes having people into school to talk about the past, whether this be a historian or a grandparent. In addition, as stated above, the pupils have the opportunity to go on history-related field trips, in order to extend their learning beyond the classroom.

New knowledge and understanding appropriate to their age

Foundation Stage pupils learn through 'understanding the world' and this is directly linked to their own experiences of the past.

In KS1, the children learn about what Corsham was like in the past, in living memory and as far back as 1066; explorers and their exploits; how the Romans influenced our local area [Bath]; lives of significant individuals; and the Ancient Egyptians.

At KS2 level, the children study how our local area has changed since 1066, as well as how it was influenced by the World Wars; the Romans; the Mayans; the Greeks; and the Sumerians.

How to keep themselves safe

When using the internet to access historical resources, children are encouraged to search safely and use child friendly sites such as Swiggle. During lessons, children have access to a wide range of resources to support their learning and are taught to respect these.

INTENT (GEOGRAPHY)

Children are taught a range of skills through a variety of activities. These skills are met throughout their school years and develop according to the children's ability. They encourage expansion of the children's knowledge and understanding of places, patterns and processes, environmental change and sustainable development.

How to communicate using appropriate vocabulary

In Foundation Stage, the children undertake a wide range of activities, which help them to develop their communication and understanding of the world around them. In KS1, the children are encouraged to use basic geographical vocabulary to refer to and describe key physical and human features of locations. The children in KS2 learn to describe and understand key aspects of: physical geography, including: climate zones, biomes and vegetation belts, rivers, mountains, volcanoes and earthquakes and the water cycle; human geography, including: settlements, land use, economic activity including trade links and the distribution of natural resources including energy, food, minerals and water supplies.

About Corsham and their local area

At Foundation Stage level, this includes observing and asking questions about aspects of their familiar world, such as the place where they live or the natural world. In KS1, pupils investigate their local area, finding out about the environment and the people who live there. KS2 pupils continue to develop their enquiry skills, investigating a variety of people, places and environments across the UK and abroad. Both Key Stages carry out geographical enquiry inside and outside the classroom and this is often linked to visits in the neighbourhood.

Through experiences inside and beyond the classroom

FS2 children are encouraged to talk about some of the things they have observed, such as plants, animals, natural and found objects. Fieldwork and observational skills are also developed for all pupils, through local field work trips and beyond.

New knowledge and understanding appropriate to their age

FS2 pupils are taught to talk about why things happen, as well developing an understanding of changes over time. In KS1, the children also begin to learn about the wider world, through exciting and enjoyable activities, such as looking at maps, atlases, globes and online resources. They use these to investigate the countries and capitals of the United Kingdom, the world's continents and oceans and explore weather and climate in the United Kingdom, as well as around the world. KS2 pupils need to locate the world's countries, with a focus on Europe, North and South America and countries of particular interest to pupils. They are taught how to identify key geographical features of the countries of the United Kingdom, and show an understanding of how some of these aspects have changed over time. They learn how to locate and understand the significance of the geographic zones of the world, as well as understanding geographical similarities and differences through the study of human and physical geography of a region or area within the United Kingdom, a European country and North or South America.

How to keep themselves safe

When using the internet to access geographical resources, the children are encouraged to search safely and use child friendly sites such as Swiggle. During lessons, the pupils have access to a wide range of resources to support their learning and are taught to respect online resources.

IMPLEMENTATION

- We have a two year rolling programme at Corsham Regis.
- ▶ In Year A, we teach History in Terms 1, 4 and 5 and Geography in Term 4.
- In Year B, we teach History in Term 1 and Geography in Terms 4 and 5.

Class							Year A

IMPLEMENTATION

Using the National Curriculum and our previous maps, we have designed new, more streamlined assessment progression maps, to aid with planning and assessment and ensuring we are teaching the key skills in both History and Geography.

Geography

These 5 intentions underpin our curriculum because we want our pupils to have a love of learning which they can share, a sense of understanding and pride of where they live, and be safe in different situations.

How to communicate using appropriate vocabulary About Corsham and their local area Through experiences inside and beyond the classroom New knowledge and understanding appropriate to their age

How to keep themselves safe

The essential skills and knowledge that we want our pupils to learn by the end of

People, Culture and Communities:

- describe environment observation, discussion, stories, non-fiction texts and maps.
- know and explain similarities and differences between different religious and cultural communities in this country, from experiences, stories and mans

The Natural World:

 know some similarities and differences between the natural world around them and contrasting environments, from experiences and stories.

KS1

- name and locate the continents and oceans
- · name, locate and identify characteristics of the UK and its surrounding seas
- · use world maps, atlases and globes
- understand similarities and differences from the human and physical geography of a small area of the UK that of a contrasting non-European country.
- identify seasonal and daily weather patterns in the UK and the location of hot and cold areas of the world
- physical features: beach, coast, forest, hill, mountain, ocean, river, soil, valley, vegetation and weather
- human features: city, town, village, factory, farm, house, office and shop
 use simple compass directions and locational and directional language to
- use simple compass directions and locational and directional language to describe the location of features and routes on a map
- devise a simple map; and use and construct basic symbols in a key
- use aerial photographs and plan perspectives to recognise landmarks and basic human and physical features
- use simple fieldwork and observational skills to study the geography of their school grounds surrounding environment.

Geography

use maps, atlases, globes and digital/computer mapping to locate

- countries and describe features studied
 identify the position and significance of the Equator, Hemispheres,
- identify the Prime/Greenwich Meridian and time zones (including day and night).
- physical features: cliff and sea
- human features: port and harbour
- use the eight points of a compass and four figure grid references
- use fieldwork to observe, measure, record and present the human and physical features in the local area.
- name and locate counties and cities of the UK geographical regions and their identifying human and physical characteristics, key topographical features (including hills, mountains, coasts and rivers), and land-use patterns; and understand how some of these aspects have changed over time.
- understand the water cycle
- locate and identify rivers and how they have changed over time

UKS2

- locate the world's countries, using maps to focus on Europe, and North and South America, concentrating on their environmental regions, key physical and human characteristics, countries, and major cities
- understand geographical similarities and differences through the study of human and physical geography of a region of the UK, a region in a European country, and a region within North or South America
- physical geography, including: biomes and vegetation belts, mountains, volcanoes and earthquakes
- human geography, including: types of settlement and land use, economic activity including trade links, and the distribution of natural resources including energy, food, minerals and water.
- use six-figure grid references, symbols and key (including the use of Ordnance Survey maps)
- · take part in orienteering

Strong Foundations

Blocked Teaching

In EYFS, understanding the world involves guiding children to make sense of their physical world and their community. Listening to a broad selection of stories our children's understanding of our diverse world develops.

This approach provides the children with an immersive experience for a term, where both knowledge and skills are explored and developed thoroughly. At the beginning of a term, knowledge organisers are shared with the children so that all understand the expectations of the learning ahead. These are in their topic books and referred to throughout each topic and revisited through weekly Topic Talk Time sessions to aid retention of knowledge as each year progresses.

As a geographer leaving Regis, every child will have the skills to:

Be aware of human and physical characteristics of places Use a range of maps, both physical and digital, AND sources, to help interpret their world view.

Communicate geographical information in a variety of ways. Use fieldwork to collect, analyse and communicate on a range of places and processes.

These 5 intentions underpin our curriculum because we want our pupils to have a love of learning which they can share, a sense of understanding and pride of where they live, and be safe in different situations.

How to communicate using appropriate vocabulary

About Corsham and their local area Through experiences inside and beyond the classroom New knowledge and understanding appropriate to their age

How to keep themselves safe

These are the essential skills and knowledge that we want our pupils to learn by the end of:

EYFS	KS1

	the expectations of the learning ahead. These are in their topic books and referred
	to throughout each topic and revisited through weekly Topic Talk Time sessions to
	aid retention of knowledge as each year progresses.

As a historian leaving Regis, every child will have the skills to:

Use the language of chronology and identify periods of history on timelines. Use primary and secondary sources including visits to find out about the past.

Talk about people, events and periods of history they have learnt about, and comment on how these have had an impact. Ask and answer historically valid questions about change, cause, similarity and difference, and significance.

IMPLEMENTATION

- We have 5 questions for each subject, linked to the National Curriculum [previously 10 questions].
- We create Knowledge Organisers for each subject, including important vocabulary and facts.
- We create our own planning, as well as using resources such as Twinkl, Plan Bee, The TES, etc.
- We include 'chatter topics' and homework ideas on the website, linked to each topic.
- We have a Topic Talk Time each week, talking about previous topics and recalling information, to help us maintain the knowledge learned.
- We have WOW days each term related to the topic it could be a trip out, a local walk, a creative day, etc. and helps engage the children with their learning in a fun and practical way.
- As subject leaders, we do drop ins to observe a lesson, look at books and hold a regular 'pupil voice', in order to see the children's learning and engagement from a variety of view points.

PROVISION (5 QUESTIONS)

Curriculum Map Mason Class [Y2/3] Year B Autumn Term 1 – History/DT

Ancient Civilisation

Who were the Ancient Egyptians?

- 1. How did the ancient Egyptians live?
- 2. What did the ancient Egyptians believe in?
- 3. What events happened and when?
- 4. What were some great historical designs and how could you use them to help with your own ideas?
- 5. How could you learn from taking products apart?

- The change from 10 to 5 questions focuses the learning more.
- The 5 questions ensure progression through the topic as well as the year groups.
- They are directly linked with the National Curriculum to ensure full coverage.
- The children learn, at a minimum, 5 new pieces of information per topic.

- The children can answer or talk around the 5 questions at the end of the topic and beyond, which can be seen through our Topic Talk Time books.
- We can see knowledge is maintained through pupil voice, where we talk to the children about previous topics.

PROVISION (KNOWLEDGE ORGANISERS)

Autumn 1: Who was Brunel and why was he important? Yr:

1/2

Skills and Knowledge

Question

Who was Brunel and when did he live?

2 Why was he famous?

3 What did he build in the local area?

- 4 What problems did he face?
- 5 Can I design, build and evaluate my structure?

Key Vocabulary

	Word	Definition
1	Engineer	Someone who uses scientific knowledge to design, construct and maintain engines, machines or structures.
2	Suspension bridge	A bridge that is supported from above by cables.
3	Victorian era	The period of time when Queen Victoria was on the throne 1837-1901
4	Voyage	A journey from one place to another, usually by boat or ship.
5	Transatlantic	Crossing or going beyond the Atlantic Ocean.

Interesting fact

- Brunel was only 5ft tall!
- 2 The Clifton Suspension Bridge was completed 3 years after he died.

Useful pictures/diagrams

- The knowledge organisers give the children the information at the beginning of the topic, allowing them to refer back to and add to it.
- As the knowledge organisers are very visual, including images and diagrams as well as writing, they are a useful resource to all learners.

- The children regularly refer back to the knowledge organisers stuck at the front of their books and hung up in the classroom.
- During pupil voice, some children bring their knowledge organisers in order to jog their memory if needed.

PROVISION (PLANNING)

Year 1/2 Topic						
n			Monday 1h15m	Tuesday 40m	Friday 55m

and why?

Lesson 1 of 6

Investigating Rivers

9eography Year 5/6

Learning Objective Resources

Slides
Water Cycle Explanation 1A/1B/1C

To understand and explain the water cycle. Explanation Poster
Water Cycle Fact Sheet
Water Cycle Poster Instructions (for FSD? activity only)

Teaching Input

- Do you know what the water cycle is? Why is it important?
- The water cycle is a way in which water moves around our planet. Without this cycle of water, plants would not grow and humans and animals would not survive.
- Explain to children another name for the water cycle is the hydrological cycle and discuss the reasons for this.
- show children a diagram of the water cycle and ask them if they know what the words mean. Invite children to discuss with a partner what they think the definitions of these words are and then reveal the answers on the next slide.
- Show children the same diagram of the water cycle and ask them to explain the cycle to a partner now they have learnt what the words mean.
- Read children the water cycle explanation and ask if they said anything close to this to their partner.
- So, how and why do rivers play a vital role in the water cycle? Ask children to discuss their thoughts.
- Rivers collect run-off from precipitation and transport it back to the ocean so the cycle can keep going.
- Ask children what flooding is and how it links to the water cycle.
- Explain to your class if precipitation is very heavy in one area, the river in that area becomes too full and breaks its banks: this causes flooding.
- What impact can flooding have on the water cycle and the surrounding communities?

Main Activity

ower ability: Middle ability: Higher ability: Provide children with the Water rovide children with the Water Provide children with the Water Cycle Explanation sheet 1C and Cycle Explanation sheet 1A and Cycle Explanation sheet 1B and rvite them to use the prompts on rvite them to use the prompts on invite them to use the prompts on the sheet to write their own the sheet to write their own the sheet to write their own explanation about the water cycle. explanation about the water cycle. explanation about the water cycle. Encourage nvite children to draw a diagram to them to write a detailed application writing.

NB: you might like to have a accompany their explanation. section (they may need to do some teacher aid work with this group. more research).

Fancy something different...?

- Provide children with A3 paper, colouring materials, Water Cycle Poster Instructions and invite children to create a poster explaining how the water cycle works.
- Make sure children draw a diagram, use and explain the vocabulary involved in the water cycle.
 Children might need to use the internet to find out some more facts on the water cycle to include in the
- Children might need to use the internet to find out some more facts on the water cycle to include in their poster.

Plenary	Assessment Questions
What would happen to the water cycle if there was no precipitation? condensation? evaporation? How would the cycle be affected?	Do children understand why the water cycle is an important process on our planet? Do children understand the steps involved in the water cycle? Can children explain the water cycle in their own words?

Copyright @ PlanSec Resources Ltd 2016 www.planbee.com

- A mix of teacher planning and online resources gives the children a broad and interesting range of learning and activities.
- The children are engaged in their lessons and produce good work.

- During subject drops ins, it has been observed that the children and teachers are engaged with the topics.
- Through looking at the children's books, it is clear that the majority of the children can complete work linked to the topic and at a suitable level.

IMPLEMENTATION (CHATTER TOPICS/HOMEWORK)

Mason Class Chatter Topics

- 1. What was life like in Ancient Egypt?
- 2. What did the Ancient Egyptians believe in?
- 3. What did the Ancient Egyptians do in their spare time?
- 4. Why is Tutankhamun so famous?
- 5. Why did the Ancient Egyptians build pyramids?
- 6. What did the Ancient Egyptians invent?
- 7. What did the Ancient Egyptians eat?
- 8. Why was the River Nile so important to the Ancient Egyptians?
- 9. How did the Ancient Egyptians communicate?
- 10. What is mummification and why did the Ancient Egyptians mummify the dead?

HOMEWORK

This term you could:

Using the words **Ancient Egypt**, write an acrostic poem.

Choose an ancient Egyptian god or goddess and create a fact file about them.

Invent a new set of hieroglyphics and use them to write your name and the names of three others.

Write 10 questions for a quiz on Ancient Egypt.

Make a model of a pharaoh's death mask.

Construct a pyramid using any suitable material.

Write down 10 questions you would ask Tutankhamun.

Draw a picture of Tutankhamun and write paragraphs about him.

- Homework and talking points allow the children to engage their parents and other family/friends in their school learning.
- It keeps the topic in their minds, even when they are not directly learning about it.

- Some homework is brought in (although this is not a requirement), showing engagement with the topic at home.
- Some children ask to share things they have talked about with their families and we hold a show and tell to encourage this.

PROVISION (TOPIC TALK TIME)

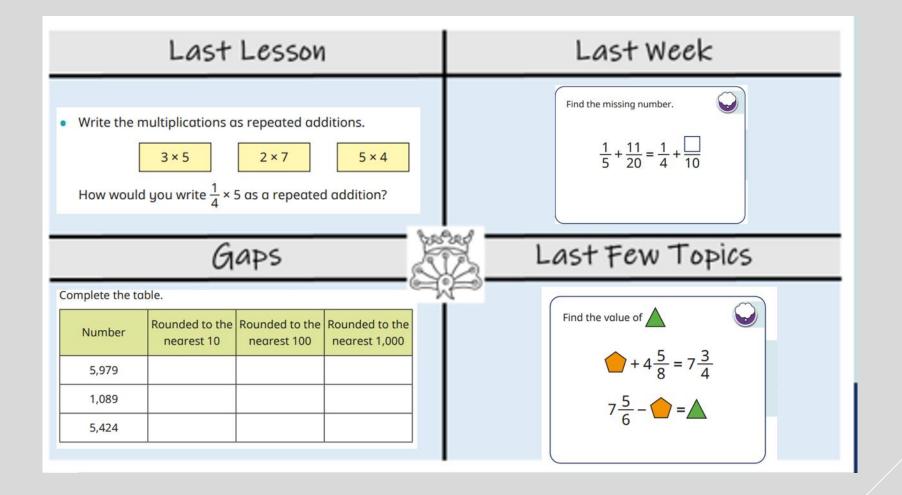

- The Topic Talk Time book is updated each week, talking about a different previously learned topic to maintain the children's knowledge.
- The teacher and children add to it in a variety of ways whole class discussion, post it notes, etc, so a feeling of ownership is encouraged.
- The book is kept close to the topic display, allowing the children to access the information at any time.

- The Topic Talk Time books are full of retained information, presented in a variety of ways.
- During pupil voice, it is clear the children are proud of their Topic Talk Time books and are eager to show them off.
- The children choose to read the Topic Talk
 Time book during free reading, showing
 their interest in it.

PROVISION (MAKING IT LAST)

- Currently being trialed in the core subjects, and making a positive impact, Making It Last will be rolled out to all the foundation topics in September 2025.
- The teacher will display a new Making It Last each lesson, picking up on gaps in learning and what has recently been learned, as well as topics explored in previous terms.

- Making It Last has been very successful in filling gaps and keeping previous learning in the children's memories.
- It will be a good way to gap fill, which can be difficult with the foundation topics.

PROVISION (WOW DAYS)

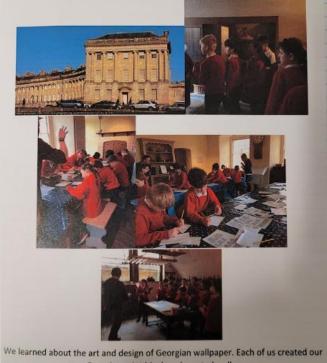

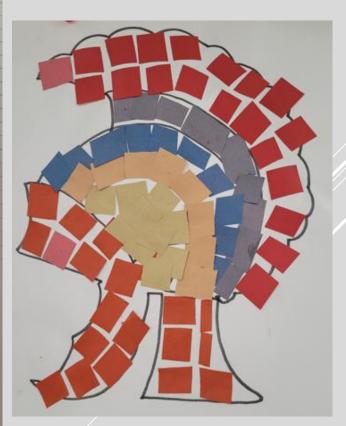

Millward Wow Day - Wednesday 28th February 2024

We had a brilliant morning at No.1 Royal Crescent. It is a magnificently restored town house museum where you can explore fashionable life of Georgian Bath of the 18th

- WOW days are loved by the children and really engage them in their learning.
- Children are given experiences they may not have had, from going on a coach, to seeing animals up close or experimenting with fabric paint.
- A wide variety of WOW days over the course of the year excites and encourages the children in their learning.

- During pupil voice, many children talk enthusiastically about WOW days.
- When looking in the books, it is clear the WOW days have made an impact on their learning.

I loved learning about the Egyptians – we made papyrus and mummified apples!

Year 4 pupil

I like learning about different parts of history and how it's different to now.

Year 3 pupil

I talked to my granny about the olden times.

Year 2 pupil

I found it really interesting learning about the Mayans.

Year 6 pupil

I learned about
Isambard Kingdom
Brunel and we made a
bridge – it was
amazing!

Year 1 pupil

My favourite history topic was learning about Corsham and how it looked in the old days.

Year 5 pupil

I talked about things from a long time ago, like when my mum was born.

FS2 pupil

PUPIL VOICE (HISTORY)

I didn't know there were so many islands in the world – really big and really tiny ones.

Year 4 pupil

I like learning about different countries and cultures.

Year 3 pupil

I made a map and it was so cool!

Year 2 pupil

Did you now that rivers carve shapes into the land?!

Year 6 pupil

We learned about how to use a map because you can't always use a phone.

I can't believe how huge the pacific ocean is!

Year 5 pupil

We went on a walk and I saw my house!

FS2 pupil

PUPIL VOICE (GEOGRAPHY)

PHOTOS/ REGIS MAGIC MOMENTS (HISTORY)

PHOTOS/ REGIS MAGIC MOMENTS (HISTORY)

PHOTOS/ REGIS MAGIC MOMENTS (GEOGRAPHY)

DATA HIGHLIGHTS FOR 2024-25

From looking at our assessment data for the school year 2024-2025, I found the following trends:

- Year 1 and 2 had more children achieving above expected in history than in geography.
- In year 3 and Year 5, children who are both pupil premium and extended duties, scored above expected in both history and geography.
- In Years 4, 5 and 6, despite being SEND heavy cohorts, all children are working within their Milestone.

FINAL REFLECTION/NEXT STEPS FOR 2025-2026

- Last year, I focused on different ways of recording from charts and diagrams to use of computers and art. I fed back my findings back to the teachers to help inspire them and have found a huge variety of recordings in the books this year, which has been brilliant.
- We continue to build some brilliant relationships with local craftspeople and property owners, and have involved those people in our geography and history learning [Lord Methuen, Nick Mason, etc.].
- Our WOW days have been extra special this year and we have decided we will do a photo montage of the day, for each child to stick into their topic books as evidence.
