## Mental Health Corner

Check in with friends...

Maintaining good relationships with friends and family is one of the most important factors in maintaining good mental health. New 'parent friends' can be great for both you and your children but sometimes old friends are the only ones who you can really confide in, have a laugh with, and make you feel better about yourself. Of course, meeting face-to-face may not always be possible but scheduling a regular call once your children are in bed or doing their homework can make all the difference.
